## BEGINNER METALWORKING 101

### Ring Blank Chart

These are estimations of how much wire to cut based on ring size. This may vary depending on the width of the shank.

Ring Size	3	4	5	6	7	8	9	10	11	12	13	14	15	16
Length (mm)	44.0	56.5	49	21.5	54.0	56.6	59.1	61.6	64.1	66.6	69.1	72.6	74.8	77.4

Or, cut out this chart to measure how much wire to cut. First, find the ring size you need to make; you can wrap this paper around your finger to be sure of the ring size. Then use this chart, starting at the thick line and running to the ring size, to measure the length of wire needed. Numbers indicate ring size.
